

Standard Tiles Available from Tile Council of North America

For further information about any of the tiles listed below, please call TCNA.

C1028 standard tile - \$50 plus shipping/handling

This 12" x 12" standard tile is used in conjunction with ASTM C1028 Static Coefficient of Friction testing. It was manufactured under controlled conditions to ensure a uniform surface. Please refer to ASTM C1028 for calibration factors.

English XL standard tile - \$25 for the continental U.S. (call for pricing if outside of the continental U.S.)

This 6" x 6" standard tile is used with the English XL testing device. Please contact the manufacturer of the English XL device for calibration factors.

ANSI A136.1 standard tile - Please call for pricing.

This flat-backed wall tile was manufactured specifically for ceramic tile adhesive testing. It meets the requirements in section 6.2.1.1 of ANSI A136.1 Specifications for Organic Adhesives for Installation of Ceramic Tile.
