Tile Council Membership Update

Tile Council of North America (TCNA) is proud to report its membership level has risen to another all-time high, demonstrating the North American tile industry's commitment to standards, quality, and education.

Currently, TCNA has 210 members, which produce over 99% of the tile made in the U.S. and Canada and approximately 98% of the tile made in Mexico. Additionally, all major U.S. setting material manufacturers are TCNA members. The combined support of its members allows TCNA to provide leadership in standards development, represent the tile industry to regulatory and trade agencies, publish technical literature, provide training, and be at the forefront in promoting the use of ceramic tile.

“We are very pleased to see the strong commitment our members have shown to support the tile industry, especially given this extremely difficult economy,” remarked TCNA Executive Director, Eric Astrachan. “This support shows the importance members attach to Tile Council’s numerous efforts on behalf of our industry.”

TCNA is a trade association representing manufacturers of ceramic tile, tile installation materials, tile equipment, raw materials, and other tile-related products. Since 1945, Tile Council has been serving the U.S. ceramic tile market and more recently the Canadian and Mexican markets, as well.

Tile Council membership is open to all North American manufacturers of tile and installation materials as well as raw material and equipment suppliers to North American tile manufacturers.
